CROP 1938

Novelty and Specialty
AND
General
TRADE LIST
OF "CALIFORNIA'S CHOICEST
FLOWER SEEDS . . . SINCE 1890"

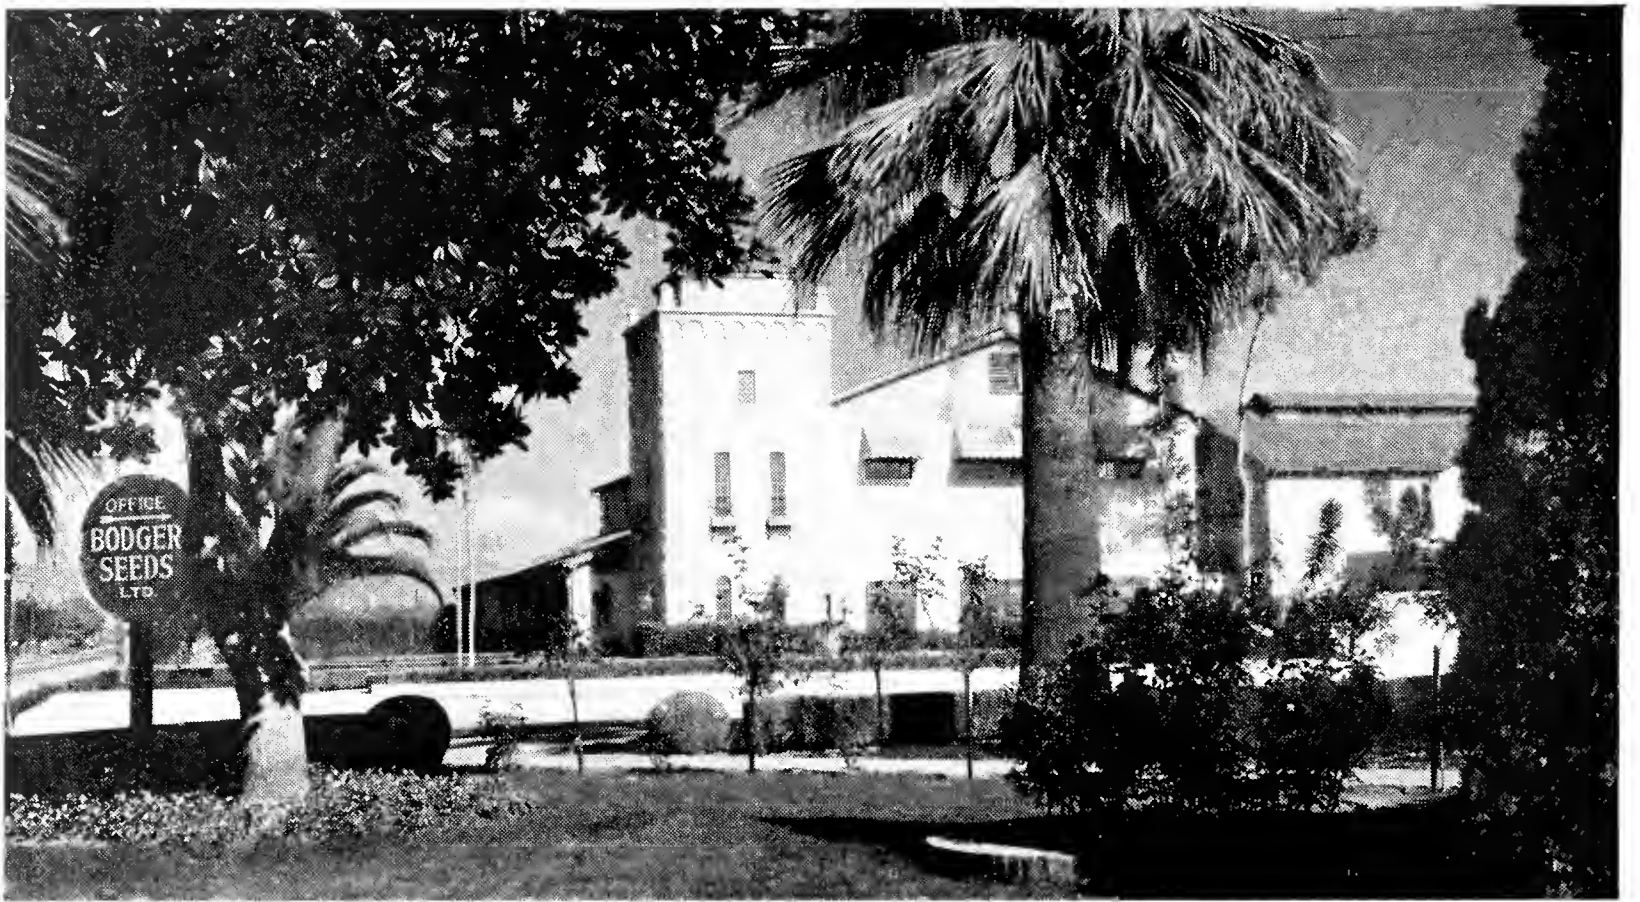

Prices in this List are effective at once for all sales from 1938 crop during the remainder of 1938 and the spring of 1939. This Trade List will be in effect until issuance of our 1939-40 Novelty and Trade List in August, 1939. We do not expect to issue an Advance Contract List in 1939.

Bodger Seeds, Ltd.
WHOLESALE GROWERS

LOS ANGELES COUNTY EL MONTE CALIFORNIA, U. S. A.

CABLE ADDRESS: Registered
"Bodger El Monte" All Codes

Our warehouse and shipping departments in the rich and fertile El Monte valley

Terms and General Conditions of Delivery

ALL SEEDS are quoted F.O.B. El Monte, California, for delivery after harvest crop 1938, 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size (5x7½ inches).

Prices quoted in this list go into effect immediately, superseding all previous quotations. **All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.**

We reserve the right to change any or all prices in this list without notice.

For every order, we agree to plant sufficient land to produce the desired quantity of seed under normal conditions.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, quality, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for the crop. If seeds are not accepted on these terms, they are to be held subject to our order.

BODGER SEEDS, LTD.

Shipping Information

Domestic: Time is important. Many of our customers use the Air Mail exclusively to save time and get the most possible out of our rapid order filling and delivery service. We suggest that you do the same. If your order is sent to us by Air Mail from the east coast it arrives the second day, is filled the same day it arrives and if shipped by Parcel Post seed will reach you within seven days from the time the order left your office. Correspondingly less time is needed when shorter distances are covered. For faster delivery, seeds shipped by Air Mail or Air Express will reach you within four days from the time your order is sent to us. For the greatest possible saving in time, send your order by wire to be shipped by air; seeds will arrive within two to three days from the time ordered.

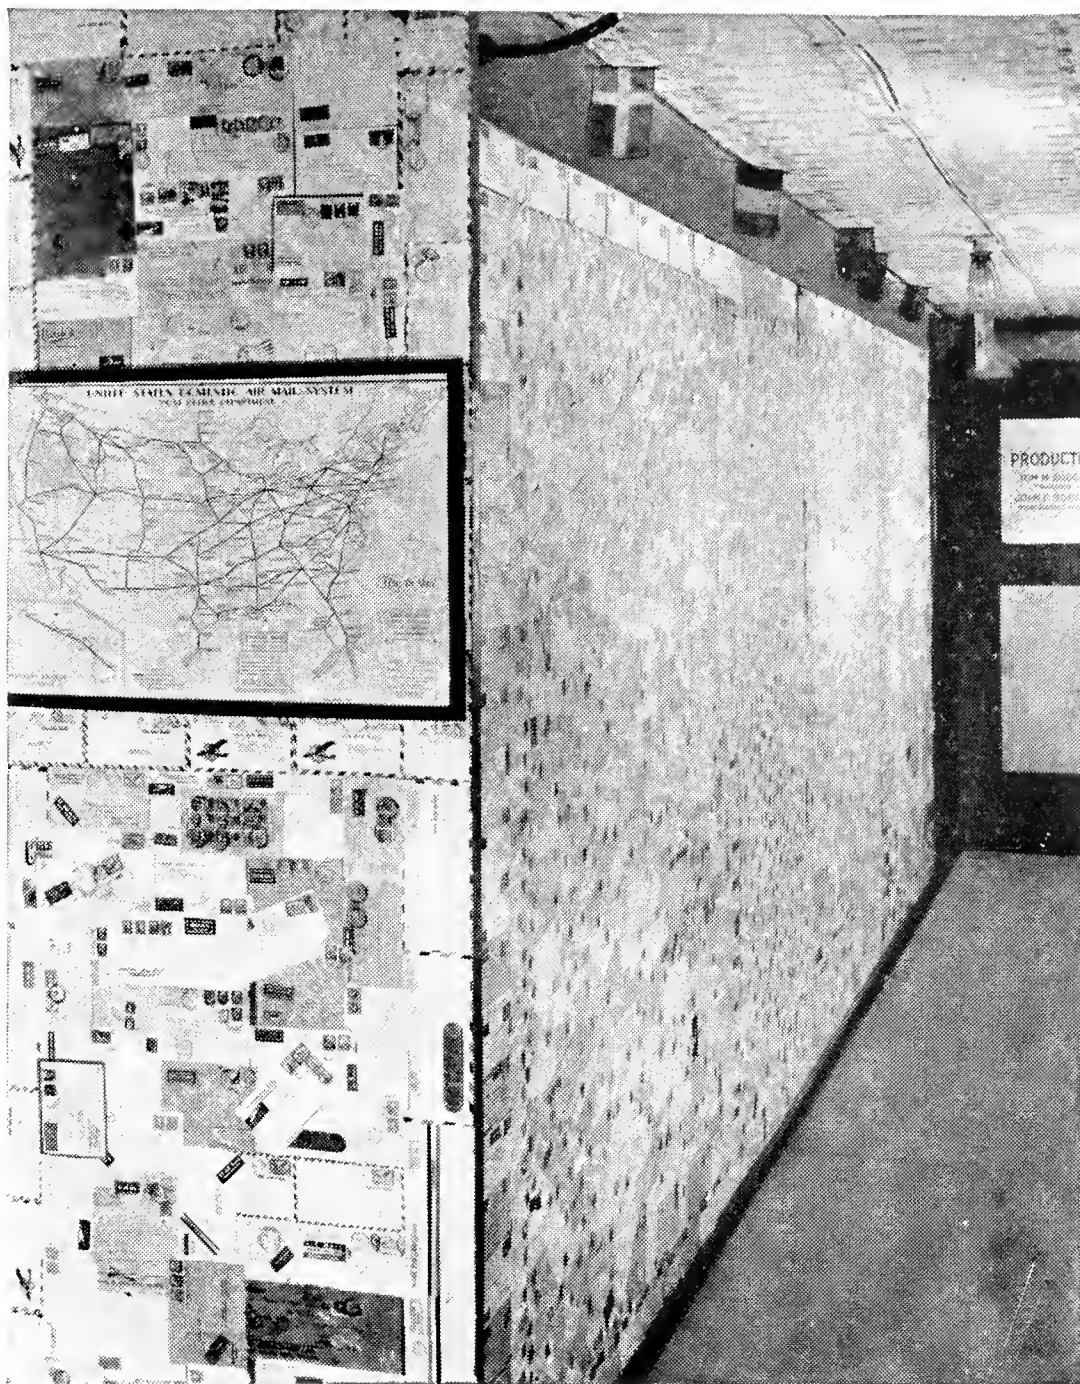

Contrary to the general impression, Air Express is not expensive. Rates are calculated on the basis of half pounds, and are very close to the ordinary Parcel Post rates. Air Mail, which is more expensive, is calculated on an ounce basis and goes as first class mail. Air transportation is no longer in the experimental stage; it is an established fact—safe, sure and economical.

Regarding rail shipments, both Parcel Post and Express will take 4 to 5 days to reach the east coast. When the shipment is over 10 pounds in weight it is cheaper to ship by express, but when it is less than 10 pounds, Parcel Post is cheaper. Parcel Post packages marked "Special Delivery" are given first class mail service and will go through practically as fast as first class matter.

Shipments of 75 pounds or over can be sent most economically by Freight. Package cars leave Los Angeles twice a week, arriving in Chicago the 7th morning and in New York the 10th morning. Contract orders and others placed considerably in advance of the time needed should be sent by Freight.

Foreign: We urge our foreign customers to use the Air Mails when sending rush orders. Although there is as yet no regular Air Mail service across the Atlantic, there is a great saving in time on both sides of the ocean, and Air Mail letters are given preference over regular mail in all handlings.

When sending orders by cable, we suggest the use of our number code to cut down on words and expense. Five numbers in a unit may be sent for the cost of one word, a rate which reduces costs considerably.

Bodger Service Department

Novelties: The amateur gardener is novelty conscious, and it is easy to sell a new variety. Novelties are your logical sales leaders, and it is decidedly to your own advantage to make good use of them in your newspaper publicity, your advertising, and your counter features in the store. Make your selections from among the novelties listed herein and you cannot go wrong.

Transparencies: Our new colored transparencies are your busiest silent salesmen. They are accurately hand colored, on film or glass, printed from our regular photographic negatives. Placed in your store window, on the counter, along the walls with the seed racks, or near the cash register, they attract attention at once, and show your customer the actual flower of the seed you have for sale. Write us for full details regarding transparencies and the cabinets in which to display them.

Electros: The very rapid increase in sales of our black and white electros and four-color nickeltypes convinces us that this branch of our Service Department has proved valuable to our customers. Included in this price list are many new black and white electros in standard sizes and new four-color nickeltypes, as well as a great many new subjects in the smaller 1"x1½" electros. See pages 139 to 140 of this list for those not included alphabetically.

All electros we send out are unmounted unless the order specifies that they be mounted. There is an additional charge of 20% for this service. Since a majority of our customers prefer unmounted electros we have followed this policy, but will be very glad to have them mounted for any who so request.

Photographs: Through our Photographic Service we are able to furnish you with a complete line of first class photographs of novelty and standard flower varieties suitable for publicity and catalog purposes. Photographs will be submitted for approval upon request.

Bulletins: The most ambitious effort of our Service Department is the publication of a series of bulletins on various flower subjects. Bulletin No. 1, The Zinnia and Its Uses, Bulletin No. 2, Asters of Today, and Bulletin No. 3, Petunias, Past and Present, have been distributed and others will follow as soon as they are compiled. If you have not received copies of these bulletins, write us and they will be forwarded promptly.

BODGER INTRODUCTIONS

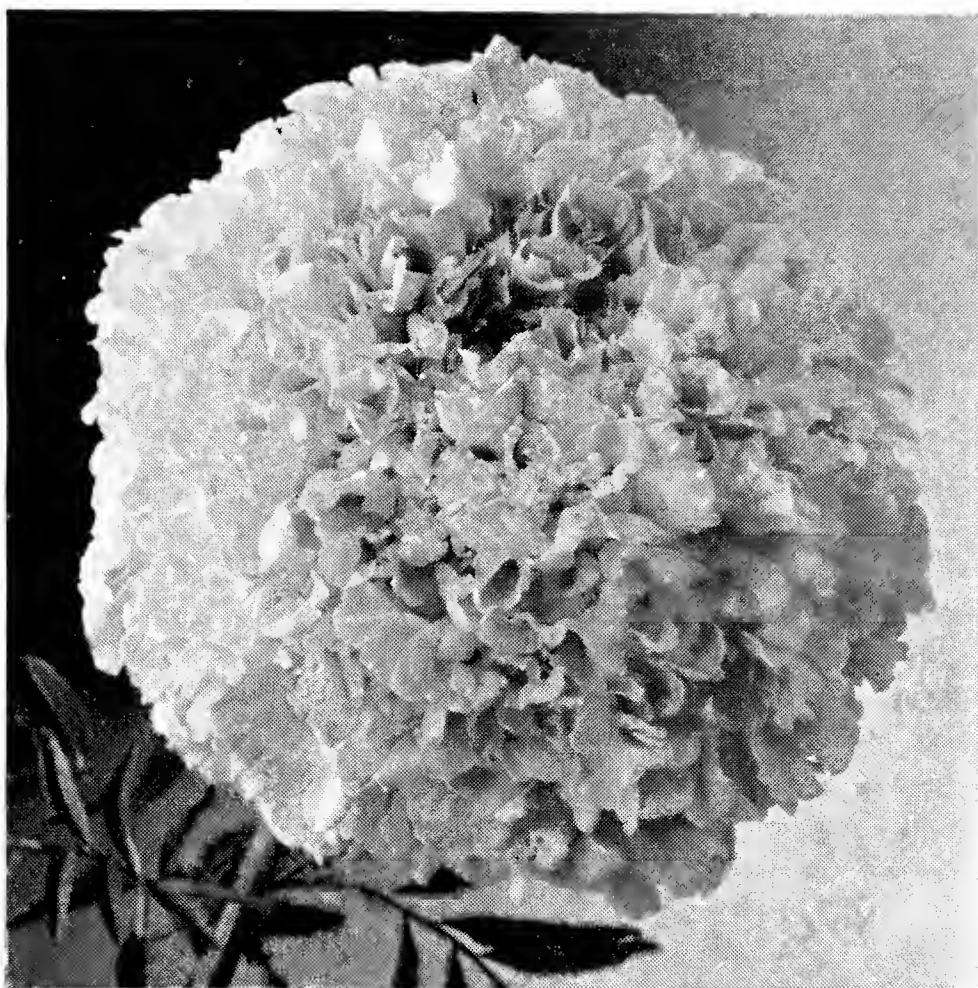

No. 555—NICKELTYPES \$20.00

Scabiosa Imperial Giants Blue Moon (Bodger)

ALTHOUGH we hybridists may sometimes feel that the business of producing new flowers is just a routine day-after-day job, every once in a while we are buoyed up when we succeed in guiding a plant into unsuspected and hitherto unimagined beauty. Such has been our experience during the development of a strikingly beautiful Scabiosa which we present herewith—Scabiosa Imperial Giants Blue Moon. The flower form is as different from the existent Scabiosa varieties as Nasturtium Golden Gleam is different from the old singles or the Dahlia Flowered Zinnia differs from the old Zinnia types. Instead of a flower composed of a few rows of broad petals surmounted by a flat pincushion-like top of small petals, this new type has flowers composed entirely of broad, heavy, wavy petals, eliminating the pincushion center entirely. In other words, the flower is literally fully double. Because of this complete doubleness, the flowers are of course extremely large and deep, $2\frac{3}{4}$ inches across and 2 to $2\frac{3}{4}$ inches deep, about the shape of an old-fashioned beehive. The color is a rich deep lavender blue, a shade which maintains its effectiveness indoors or out. The plant type is just as great an improvement over the old as the flower itself. In its development we have followed the modern trend of streamlining for space saving. Plants are extremely upright growing, tall, 42 to 48 inches in height as grown on our ranches and the long, heavy yet wiry stems hold the flowers proudly erect, completely eliminating the weak necks which are a fault of older types. Blue Moon is an ideal cutting type, because of the stem length, fully 27 inches even when field grown, and especially because the large beautifully shaped flowers are a luscious shade of deep lavender blue so hard to find in annual flowers.

No. 8140 Price per oz., \$2.15 Per lb., \$25.00

Approximately 3,500 seeds per ounce.

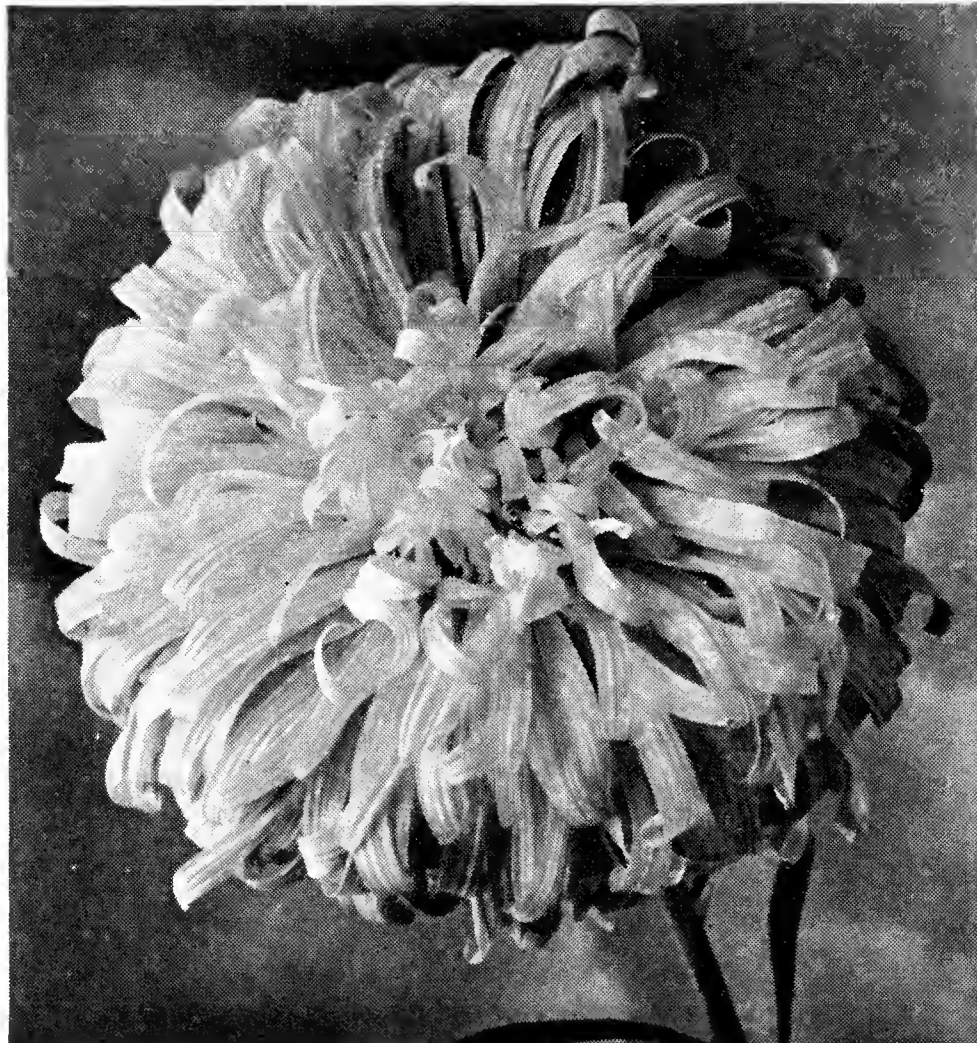

No. 427—ELECTRO \$2.35

Marigold Gigantea Orange Sunset (Bodger)

OUTSTANDING in three very important characteristics, we present Orange Sunset as the foremost Marigold variety of the year. The flowers, which average 5 inches and over in diameter as grown in the fields, are unquestionably the last word in the attainment of size. Quite naturally a flower of these dimensions is one of the showiest and most colorful garden subjects. Add to these attributes of size and showiness their delightful sweet fragrance, and you have a combination hard to resist. Like its parent variety, Sunset Giants, Marigold Orange Sunset has flowers that are loosely formed, very full centered, with broad, heavy wavy petals which gracefully overlap to make a flower ideal not only for garden decoration but for cut flower use as well. The color is a deep rich, lively orange, one of the most admired shades found in the Sunset Giants Mixture. The plants are strong growing, upright branching in habit, usually about 3 feet tall, producing a heavy growth of foliage, and with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Blooming commences about the first of August in most sections of the country, in late June in the southern states, and flowers can be depended on well before frost in any latitude. Orange Sunset has been tested and found to be a fine forcer in the greenhouse, and will come over 65% double.

No. 4994 Price per oz., \$2.55 Per lb., \$30.00

Approximately 8,000 seeds per ounce.

Aster Early Giant Wilt-Resistant Peach Blossom (Bodger)

DURING all the years in which we have been engaged in developing wilt-resistant strains of Asters we have had considerable difficulty with the more highly bred, strictly florist types such as the Giants of California, Super Giants, Giant Mammoth Paeony Flowered, etc. We have found it impossible to transfer the character of resistance to the types as they stand. To obtain wilt resistance in any of these types we have had to work up the type along with the resistance to eventually obtain a wilt-resistant, florist-type strain. In this process of development we have evolved a valuable new type which we are introducing this season as Early Giant Wilt Resistant. The flowers are very similar to the Giants of California blooms, very large and full with broad, graceful petals, daintily plumed and intertwined. The plants, however, differ considerably from the Giants of California since they are only 1½ to 2 feet tall with branches coming from low on the central spike, and only 6 to 8 flowers are produced on each plant. There are practically no laterals or side branches. One of the most desirable characteristics is the early blooming habit of this type, the flowers being produced on our ranches about August 20 so they could safely be counted on by the first week of September in any part of the country. The variety Peach Blossom presented herewith has particularly attractive full-petaled flowers of an attractive shade which opens almost white and flushes light pink then lavender pink as the flower fully matures.

No. 38 Price per oz., \$2.15 Per lb., \$25.00

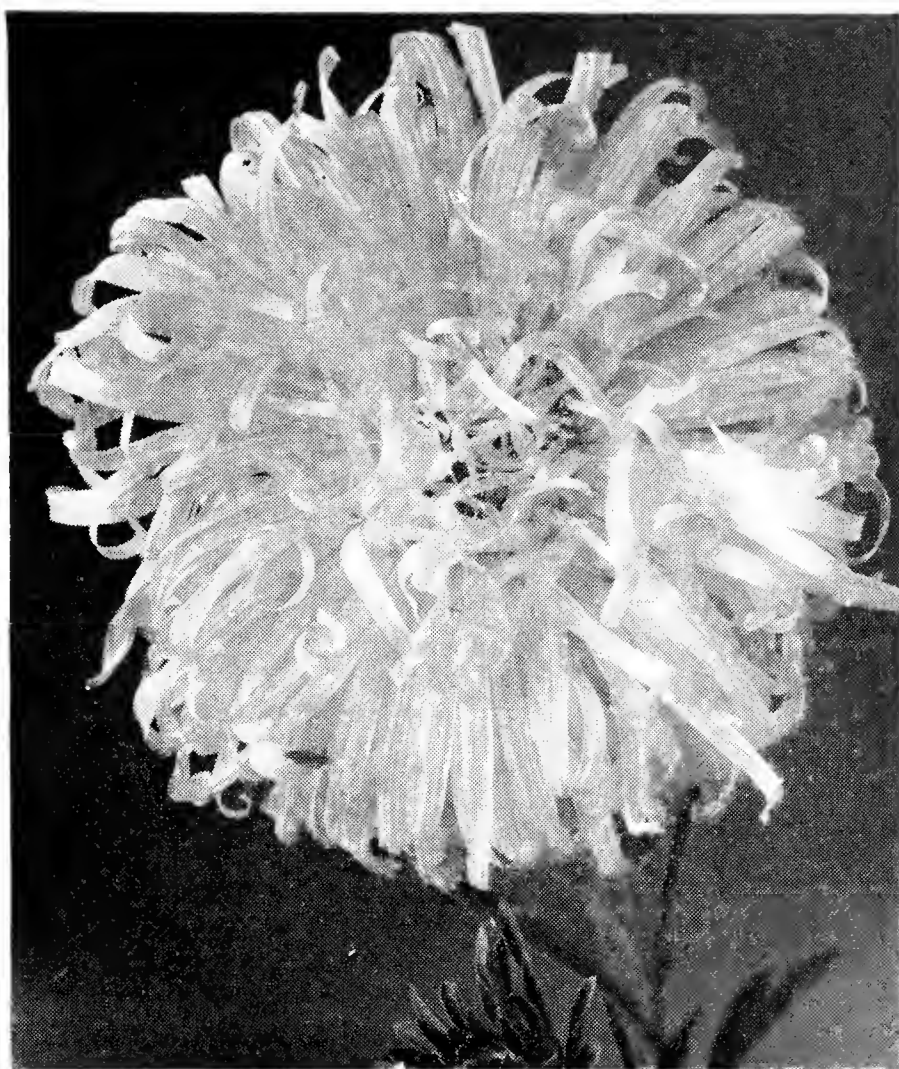

Approximately 12,000 seeds per ounce.

Aster Early Giant Wilt-Resistant Light Blue (Bodger)

Award of Merit **ALL-AMERICA SELECTIONS** 1939

OF THE SAME excellent early blooming, semi-tall basal branched, non-lateral type, Light Blue is a very worthy companion to its sister variety Peach Blossom. Both are fully wilt resistant, extremely large flowered and most attractive florist colors, as well as being favorites with the home gardener. The color is a clear, rich light blue, a shade which blends in beautifully with either deeper or lighter tones. Granted an A.A.S. Award of Merit last year, introduction was withheld until this year because of seed shortage.

No. 34 Price per oz., \$2.15
Per lb., \$25.00

No. 386—ELECTRO \$2.25

Approximately 12,000 seeds per ounce.

Aster Giant Mammoth Paeony Flowered Mariner (Bodger)

No. 456—ELECTRO \$2.25

THE PAEONY FLOWERED is one of the finest florist type Asters, especially where flowers are to be sent any distance. They are admirably adapted to shipping as the compactly placed, rather heavy petals can stand handling much better than more fragile types. The plants are strong and robust, 2½ to 3 feet tall, with long, stout, non-lateral stems bearing large flowers. The variety Mariner adds a new color to the group, a rich medium or navy blue with light green stems. Al-

though not a Wilt-Resistant variety, Mariner is well worth your consideration.

No. 114 Price per oz., \$2.15 Per lb., \$25.00

Approximately 12,000 seeds per ounce.

Aster Giants of California Loveliness (Bodger)

No. 457—ELECTRO \$2.25

IN LINE with the trend of the times for the fulfillment of a more abundant life and a departure from the harder, more rugged and strenuous existence, the demand in flower styles has changed from the strong, exciting colors to soft tranquil pastel tones. Few garden flowers can more easily fill this need than Asters. The soft satiny texture of the petals gives a luscious sheen to any shade, but particularly the soft pastels. Distinctly new and definitely desirable is the lovely rich pure pink lightly touched

with salmon, of this new Aster Loveliness. The flowers are large and full with gracefully interlacing petals which blend to a very soft pink, almost white at the tips. The plants reach a height of about 3 feet, and bear several long, non-lateral branches, each bearing one large, well-formed flower. Like other Giants of California varieties the strain is rather late blooming, coming into flower from mid to late September. This is not a wilt-resistant variety.

No. 82 Price per oz., \$2.15 Per lb., \$25.00

Approximately 12,000 seeds per ounce.

Zinnia Fantasy Orange Lady (Bodger)

A WORTHY COMPANION to Rosalie, Orange Lady brings to the Fantasy group a rich shade of deep bright orange, equally desirable. The medium-sized, 2½ to 3 inch rounded flowers are shaggy and gay in appearance, a colorful spot of color in the garden and extremely desirable for cutting. The 2½ to 3 foot well formed, strong growing plants will commence flowering within 45 to 50 days after seed is sown.

No. 1336 Price per oz., \$1.05

Per lb., \$12.00

Approximately 5,000 seeds per ounce.

No. 446—ELECTRO \$2.20

Zinnia Fantasy Rosalie (Bodger)

MOST INTERESTING of the newer Zinnia developments, the Fantasy type maintains its place as a reigning favorite among Zinnia enthusiasts. Since we first started working on this type, we have been carrying on the development of separate colors. A few years ago we introduced the golden yellow variety Star Dust and this season we are presenting three additional colors, among which we consider Rosalie particularly fine. The color is a bright, intense rose, equally lovely in the garden or when cut. Plants are neat in habit, strong growing and very free flowering, about 2½ to 3 feet in height. The delicate informal flowers, composed

No. 445—ELECTRO \$2.35

of a mass of shaggy, ray-like petals are quite distinct from the stiff, formal Zinnias to which we are accustomed. For flower arrangement the type is superbly adapted to the ordinary home and keeping qualities are excellent.

No. 1342 Price per oz., \$1.05 Per lb., \$12.00

Approximately 5,000 seeds per ounce.

Zinnia Fantasy White Light (Bodger)

Recommended **ALL-AMERICA**  **SELECTIONS** 1938

THE THIRD of our Fantasy Zinnias to receive recognition in the All-America Selections, White Light is a very worthy successor to Star Dust and the Mixture, both of which were granted Awards of Merit at the time of their introduction. As near to a pure white as any Zinnia yet developed, White Light is an excellent addition to the group of white flowers so much in demand by the florist trade. Practically 100% true to color, the medium-sized, shaggy petaled, informal flowers are lovely in flower arrangements and while not exactly showy in the garden, lend a soft note of restfulness. The free blooming plants are 2½ to 3 feet in height, with stems of good length for cutting, and will be in flower 45 to 50 days after seed is planted. Any garden will be enriched by the addition of these three new Fantasy Zinnias, White Light, Rosalie and Orange Lady.

No. 1346 Price per oz., \$1.05 Per lb., \$12.00

Approximately 5,000 seeds per ounce.

No. 374—ELECTRO \$2.35

Zinnia Super Crown O'Gold Pastel Tints (Bodger)

I FEEL this Zinnia was the best thing you sent me." So wrote a prominent seedsman to whom we had sent a collection of pre-introduction trial packets last season. Practically everybody who has seen this striking new Zinnia in flower has similarly enthused over its beauty. Our own feeling in the matter is that among large flowered types, this is unquestionably the very finest new Zinnia introduction since the original Dahlia Flowered. While it is of the Crown O'Gold type, that is, each petal of the flower is overlaid at the base with deep golden yellow while carrying out the individual flower color at the tip, the blooms are of much better form and considerably larger than the old type. The most important difference, however, is the color range. The new Pastel Tints contains a wide range of pastel shades, including soft yellow, old gold, light pink, apricot pink, various shades of salmon, peach and buff, as well as pure white and cream. None of the dark colors found in the ordinary Crown O'Gold Mixture are included in this new Pastel Tints. For cutting it is unexcelled and for garden use it is very hard to surpass. The plants are strong, growing about 3 feet tall, and flowers are borne profusely throughout the season, first appearing about 60 days after seed is sown.

No. 1330 Price per oz., \$1.30 Per lb., \$15.00

Approximately 2,800 seeds per ounce.

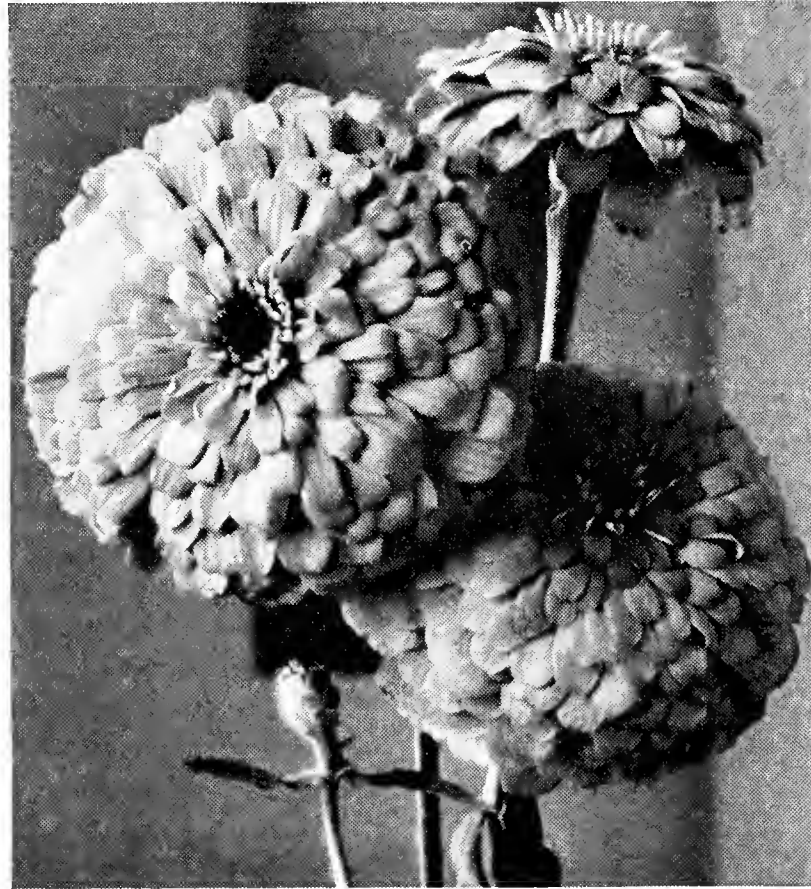

No. 444—ELECTRO \$2.45

Zinnia Scabious Flowered Sunburst (Bodger)

THE SCABIOUS FLOWERED type of Zinnia, as long as we have grown it, has attracted the attention of visitors to our ranches, but their comment has almost invariably been, "The mixture is all right, but when will you have the colors?" Of course, we have been working on the various colors for several years, but not until this season have we felt justified in introducing one of them. Sunburst, however, has now met our requirements and we are proud to present it as the first of the Bodger-produced colors in the Scabious Flowered type. Our strain, unlike some others, has a very full, rounded, mound-like center of small frilly petals rather than the ordinary, disc-petal centers found in some strains now on the market. Flowers are medium-sized, 1½ to 2 inches across, carried on strong stems of medium length. The plants are 2 to 2½ feet in height, branching and free flowering. The color is a very vivid, pure, canary yellow, dazzling in its intensity. Sunburst is a very showy garden variety and is particularly effective for home decoration. It is comparatively early flowering, blooming within 40 to 45 days from the time of planting.

No. 1472 Price per oz., \$1.05 Per lb., \$12.00

Approximately 6,000 seeds per ounce.

No. 448—ELECTRO \$2.10

Zinnia Early Wonder Fiesta (Bodger)

THE OUTSTANDING use for the Early Wonder type of Zinnia is in the florist trade, because of the peculiarly favorable plant habit. The free flowering plants are unique in form, 12 to 15 inches in height, with long wiry stems almost devoid of foliage, basal branching and without laterals. Because of the lack of foliage, the plants can be grown very close together either in the greenhouse or cut flower row. Since they are also extremely early blooming, producing flowers within 30 to 40 days from the time of seeding, they are even more desirable for this use. Since they do bloom in so short a time and give such a wealth of bloom in proportion to the size of the plants, they are also extremely useful in the garden. By making successive sowings every ten days or two weeks, Early Wonder Zinnias can be had fresh and bright for picking all through the summer and late fall. Our previous three color introductions have been very well received and we feel confident that this variety, Fiesta, will be equally popular. The color is a rich deep red, deepest of all the reds, similar to the Dahlia Flowered variety Meteor.

No. 1512 Price per oz., \$1.05 Per lb., \$12.00

Approximately 3,300 seeds per ounce.

No. 410—ELECTRO \$2.20

Calendula Chrysantha Twilight (Bodger)

ALTHOUGH a considerable number of new flower types have been developed in the Calendula group, none is enjoying more genuine and lasting popularity than the Chrysantha type. Headed in 1934 by the original Chrysantha or Sunshine the color range has been broadened by the subsequent introduction of Orange Sunshine and is now rounded out with the presentation of our current novelty Chrysantha Twilight. Twilight is large flowered, blooms measuring 4 inches across, and has the same light, informal flower form with long, slender incurved petals, which makes it very pleasing for cut flower use besides being most decorative in the garden. The color is new, soft pastel yellow blended with white, reminding one of thick, rich cream. The creamy yellow shade is much deeper in the younger flowers than when they are fully developed. The color varies somewhat, some flowers lighter, others deeper and some even showing a slight tinge of apricot yellow. One of the most desirable characters of the Chrysantha type Calendula is the length of stem with a minimum of short lateral branches. Plants are about 2 feet tall and the stems all of 15 to 18 inches under ordinary field conditions. Although long, the stems are more wiry and less heavy-looking than the other types.

No. 2504 Price per oz., \$.90 Per lb., \$10.00

Approximately 4,000 seeds per ounce.

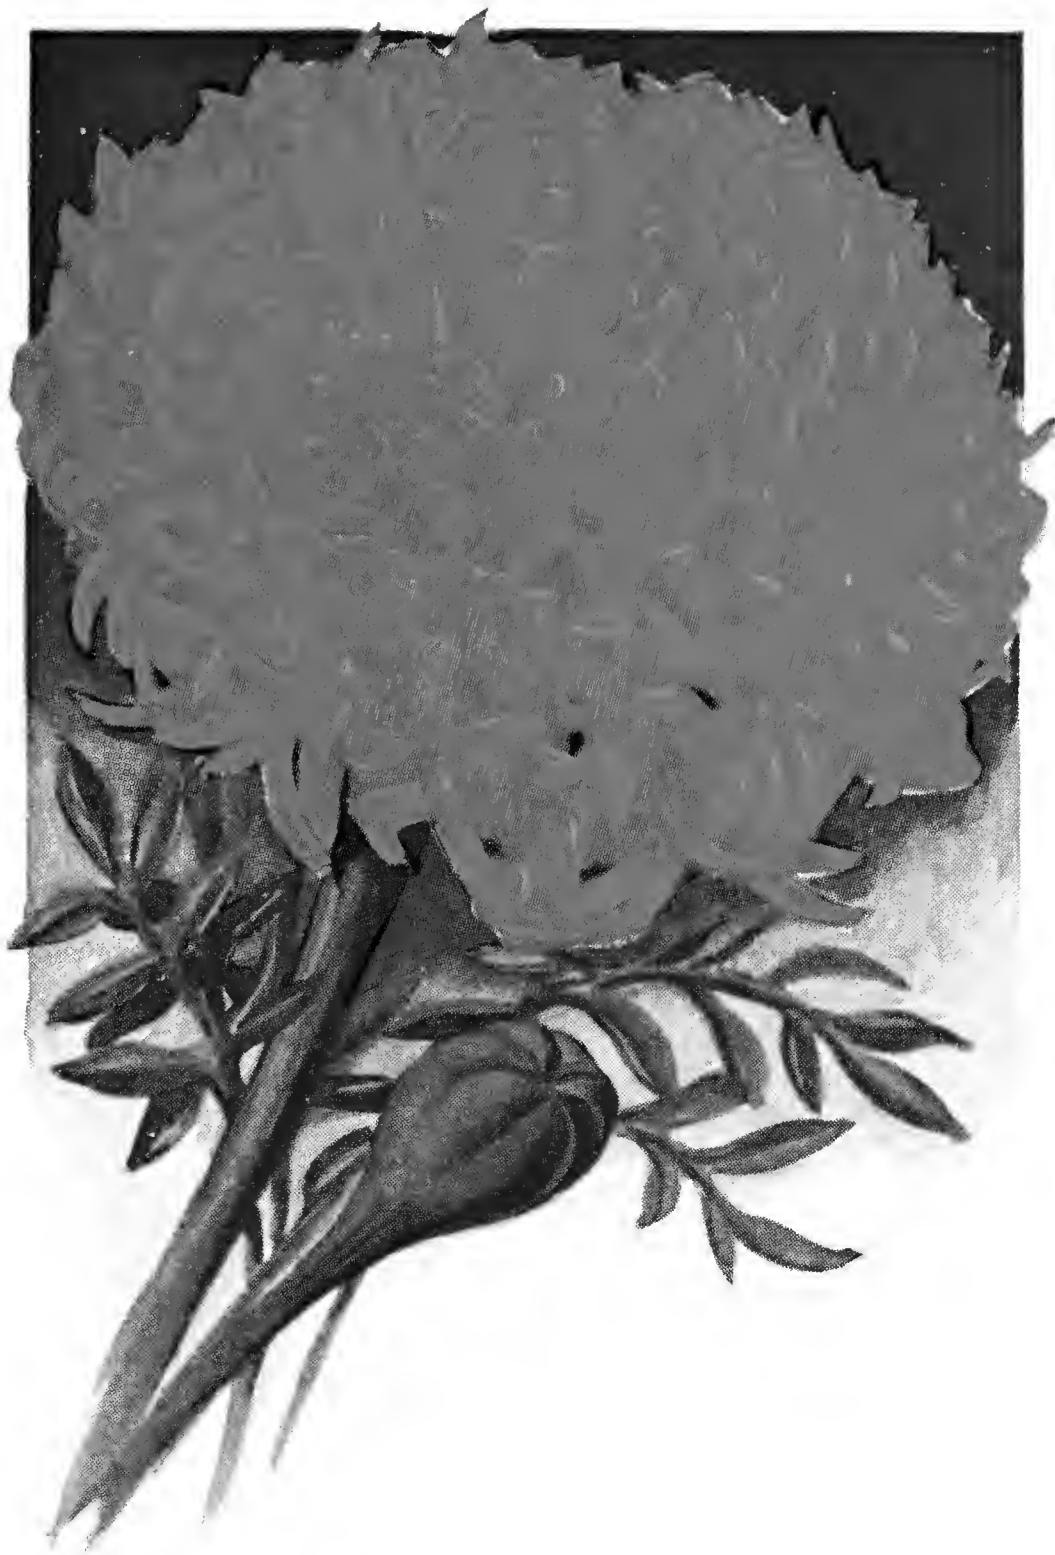

No. 409—ELECTRO \$2.20

Arctotis Hybrids Autumn Shades (Bodger)

AMONG the dozens of colorful winter and spring blooming flowers suitable for California and southern gardens, none is more gay and cheerful than these new Autumn Shades in the popular Arctotis Hybrids. Under conditions similar to those prevailing in California, seed sown fairly early in the spring will flower the same year and give a wealth of the bright, daisy-like flowers throughout the latter part of the summer and up until frost. The plants the first year will not be more than 8 to 10 inches in height, rather compact and with fairly long stemmed flowers carried above the foliage. Although classed as an annual, with us it is a very satisfactory perennial, although it would not stand the extreme cold in the northern latitudes. In the milder climates where plants will carry over, they will be as much as 2 feet tall during their second and succeeding years and will have literally dozens of flowers in bloom at a time, commencing in December or January. The colors include many tones of red, orange, burnt orange, bronzy orange and various shades of yellow and cream, typical autumn tones. The foliage is soft gray green with slender wavy edged leaves. Arctotis Hybrids Autumn Shades is a decided addition to the border garden.

No. 2206 Price per oz., \$2.95 Per lb., \$35.00

Approximately 9,000 seeds per ounce.

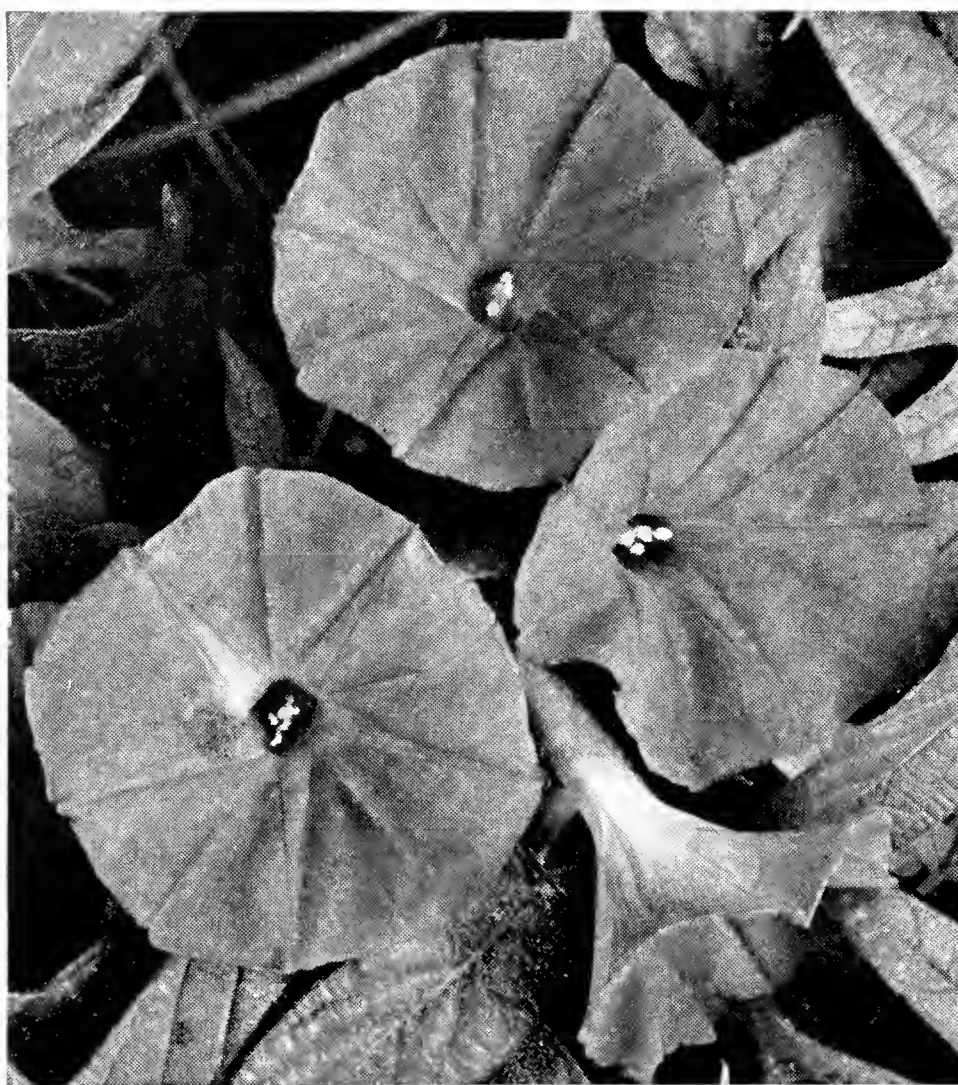

No. 514—NICKELTYPES \$15.00

Marigold Sunrise

SOME YEARS AGO the Land of Dixie gave us Marigold Dixie Sunshine, a very desirable but unfortunately late blooming variety. Now, far from the Land of Dixie, from Canada in the North, the land of the rising sun, comes Marigold Sunrise, an early blooming form of Dixie Sunshine. The flowers are large and ball-shaped, ingeniously composed of dozens of tiny five-petaled florets, gracefully interlocking, daintily fringed in effect. The color is brilliant golden yellow, a ray of dazzling pure beauty. Of particular interest is the fact that Sunrise comes 100% fully double and blooming commences by August 15, assuring its adaptability to any locality. The plants are tall, bushy, heavily covered with the colorful blooms and remain in flower over a long period. The original parent plant of Marigold Sunrise was discovered by Mr. W. H. Gale of Stokes Seeds, Ltd., St. Catharines, Ont., Canada, and it is through an arrangement with this company that we are undertaking wholesale distribution of the strain which they subsequently developed.

No. 4982 Price per oz., \$2.15 Per lb., \$25.00

Approximately 9,000 seeds per ounce.

No. 423—ELECTRO \$2.50

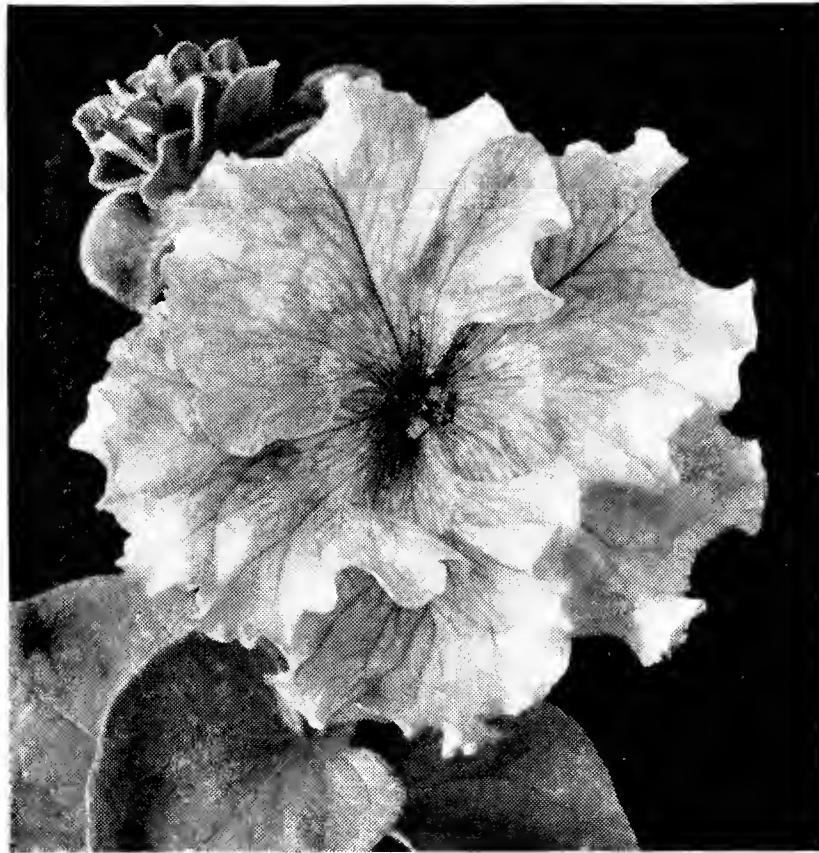

Ipomea (Morning Glory) Scarlett O'Hara

Gold Medal **ALL-AMERICA SELECTIONS** 1939

THE LONG AWAITED and somewhat obstreperous Scarlett O'Hara is at last ready for presentation to a waiting garden world. Ever since word first began to filter through the trade that this Morning Glory was soon to be presented, interest has been running very high. Scarlett O'Hara is an entirely new color in this popular garden flower, rich dark wine red or deep rosy crimson. While the flowers are not quite as large as the Heavenly Blue Morning Glory, they are of good size, about 4 inches in diameter, freely produced on fast growing vines which start blooming within 65 days after seed is sown, and are very showy for covering a fence or trellis. The dark green foliage does not make a heavy growth, leaving the plants graceful in appearance. As few plants are easier to grow or give a more colorful and satisfying return for the care given them than the Morning Glories or Ipomeas, Scarlett O'Hara will most certainly be a reigning favorite this season and for many years to come. Although granted the only Gold Medal in last year's All-America Selections, Scarlett O'Hara was held over for 1939 introduction because of a scarcity of seed supplies last season. Since this variety will receive tremendous publicity in newspapers and magazines and will be in demand by every garden enthusiast, we urge all our customers to cover for seed supplies immediately.

No. 4384 Price per oz., \$1.30 Per lb., \$15.00

Approximately 700 seeds per ounce.

No. 461—ELECTRO \$2.25

Petunia Ruffled Giant Marilyn

FEW FLOWERS have more individual beauty than the Ruffled Giant type of Petunia and no color is more popular this season than salmon. By these tokens, Petunia Marilyn should be one of our best sellers, for it is of the popular Ruffled Giant type, with large, shallow, open throated flowers, ruffled but not fringed, 4 to 5 inches in diameter, in a very luscious shade of salmon rose strongly veined deeper salmon rose. The salmon blends to a lighter shade toward the outer edges of the ruffles, and the throat at the center is also a lighter shade. Marilyn is unquestionably the most attractive color now available in any Petunia variety. The plants are free flowering, rather upright in habit, with characteristic broad heavy foliage, commencing to flower when but a few inches high and continuing profusely throughout the summer months. We unhesitatingly recommend Petunia Marilyn for florist or home garden use and know that it will be immediately and enthusiastically received.

No. 5692 Price per 1/16 oz., \$4.00 Per 1/4 oz., \$12.00 Per oz., \$40.00

Approximately 165,000 seeds per ounce.

No. 463—ELECTRO \$2.75

Petunia Grandiflora Nana Compacta Velvet Ball (Vis-Bodger)

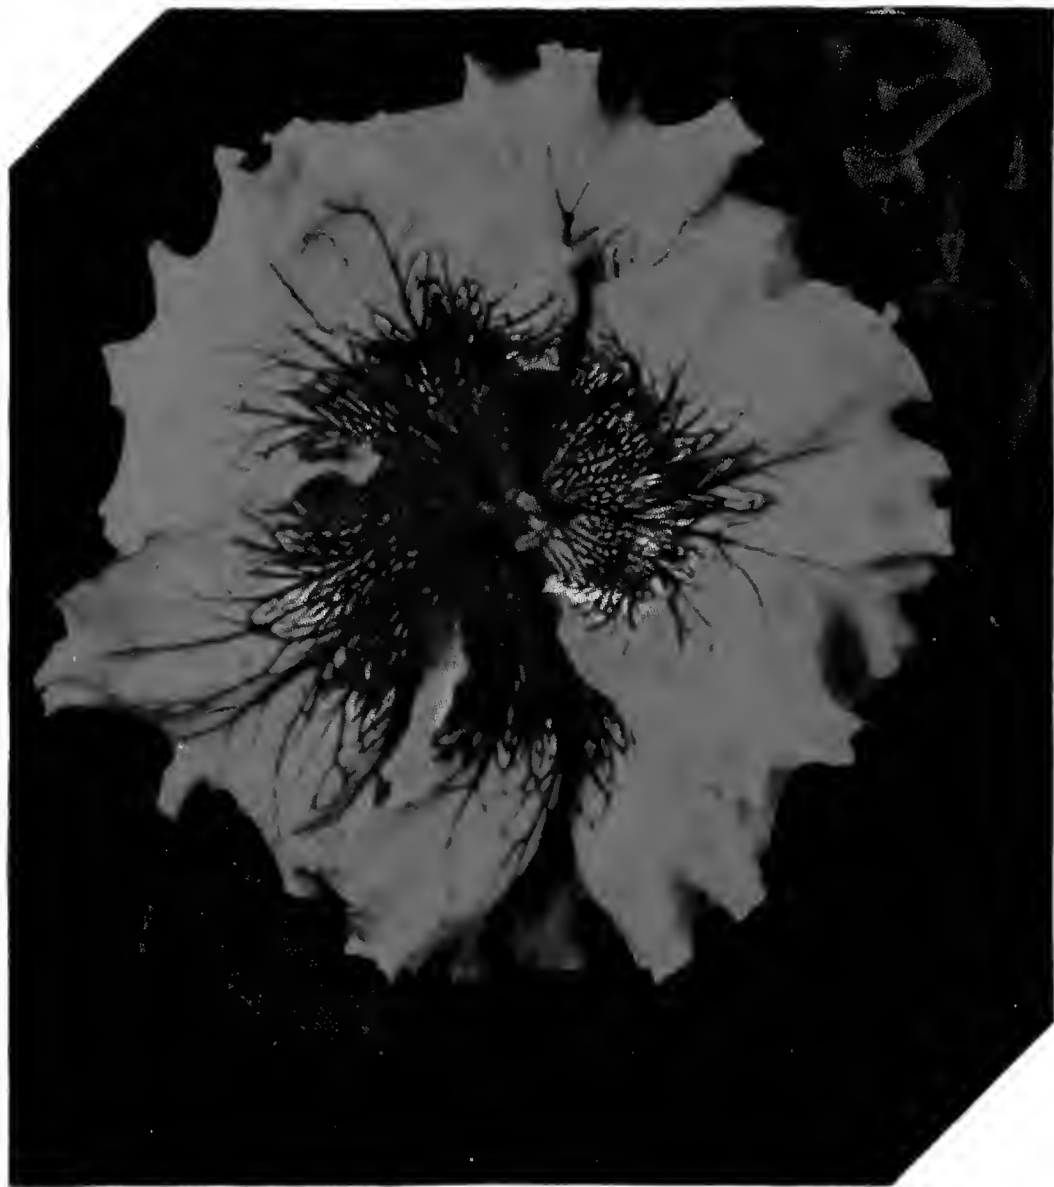

SEVERAL NEW PLANT types have been developed in Petunias recently, most of them showing the influence of streamlining. The new Grandiflora Nana Compacta type which we present herewith follows this streamlined tendency in a plant which comes as near as any so far developed to a round compact ball shape. The habit is the last word in excellence for compactness, dwarfness and free flowering character. The plants reach a height of about 8 inches, with a spread of only 8 to 10 inches and will have a dozen or more flowers in bloom at a time, each comparatively large, about 2½ inches in diameter, well shaped and of a deep luscious shade of velvety blood red. The variety comes remarkably true both to color and habit, having only 6% off types and shades. For pot plant use, for florist sales, or as a border or edging plant, Velvet Ball has no equals. Vis Brothers are the originators of Velvet Ball, which through an arrangement with their firm we are growing and distributing this year. Seed supplies are limited this season, so orders should be placed at once for delivery after harvest.

No. 5444 Price per 1/16 oz., \$1.50 Per ¼ oz., \$4.50 Per oz., \$15.00

Approximately 200,000 seeds per ounce.

1937-1938

BODGER INTRODUCTIONS

No. 553—NICKELTYPES \$15.00

Petunia Giants of California Bodger's Supreme Florist Strain (Bodger)

FOR MANY years visitors to our growing grounds have admired our stocks of the Giants of California type of Petunia. We have been especially complimented on a strain of rose and pink shades which we have been working on for several years. This strain we are now offering as Bodger's Supreme Florist Strain. It is of the well known Giants of California type, with very large ruffled, 5" to 7", shallow open throated flowers, freely produced on strong growing plants which may be as much as two feet tall by the end of the season. It is an excellent bedding variety as well as a fine window box type. Flowers are produced in less than 4 months from the time seed is sown, the first one appearing when the plant is only a few inches tall. We have for some years had a demand for this type of Petunia in a color range comprising the lighter rose and pink shades, all with light throats, and have been very much pleased at the enthusiastic reception accorded this Supreme Florist Strain since its introduction last season.

No. 5718 Price per 1/16 oz., \$5.00 Per 1/4 oz., \$15.00 Per oz., \$50.00

Approximately 162,000 seeds per ounce.

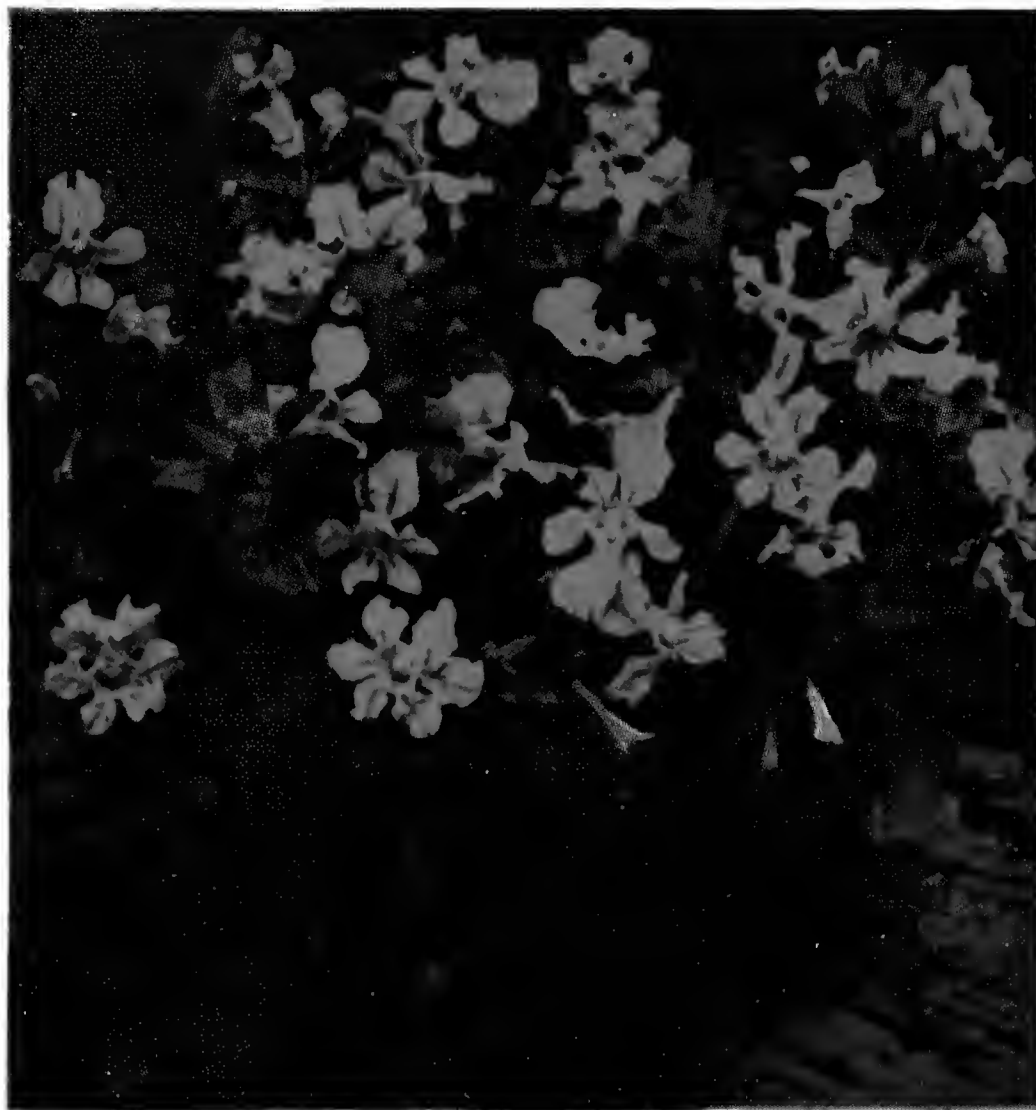

No. 533—NICKELTYPES \$15.00

Tithonia Speciosa Grandiflora Fireball (Bodger)

DAZZLING as a ball of fire poised high above other flowers, Fireball is, undoubtedly, the last word in brilliance of color in a fall blooming plant. Many who have known and enjoyed Tithonia Speciosa have considered it the brightest possible flower for fall use. With the introduction, however, of Fireball, this older variety is entirely overshadowed. Fireball is a very brilliant, vibrant shade of scarlet orange, the petals in dazzling contrast to the clear yellow center. The gaily colored flowers are single, very large, 4½ to 5 inches in diameter, and are carried on fine long stems. The plants are very tall, some reaching a height of 8 or 9 feet, with a fairly heavy growth of grayish green, woolly foliage. They are, however, neat in appearance, filling in well from the very base of the plant to the top, and unlike the older Tithonia Speciosa do not become ragged looking. In southern warm districts, seed should be sown in late spring outdoors, while in the northern sections it should be started indoors and the plants set out after danger of frost has passed. Tithonia Fireball is a tender annual, flowering late in the season, and is not subject to plant diseases. It is extremely showy in the garden and an excellent new cut flower variety as the flowers will keep five or six days when cut.

No. 7722 Price per oz., \$1.30 Per lb., \$15.00

Approximately 4,000 seeds per ounce.

No. 535—NICKELTYPES \$15.00

Cuphea Firefly

IN OUR quest for a plant which is dwarf, compact, neat in habit, and showy for modern gardens, it is a joy to discover Cuphea Firefly. A newcomer last season, Firefly has all the characteristics needed in a dwarf, compact plant. The flowers are small and delicately formed, fiery cerise red in color, and are freely produced on compact plants which reach a height of about 10 inches. The general effect of a plant when in full bloom is a ball of fire, recommending itself at once as a subject for the rockery, for window boxes, for flower pots, or as a border or edging variety. It is a tender annual flowering readily in twelve to fourteen weeks from seed, and blooms profusely throughout the summer months.

No. 3328 Price per oz., \$3.50 Per lb., \$40.00

Approximately 7,200 seeds per ounce.

No. 536—NICKELTYPES \$15.00

Cosmos Sensation Pinkie and Purity (Bodger)

THE Sensation type of Cosmos is today the favorite for cut flower use. The fact that the flowers are of immense size, 4 to 5 inches or more in diameter, with broad heavy fluted petals which slightly overlap, giving a very full single flower, make it ideal for cut flower use. These large flowers are carried on very long strong stems and are freely produced on plants which reach a height of 3 to 4 feet and have a fairly heavy growth of foliage. The flowers are produced within 8 to 10 weeks from the time seed is sown. While the flowers are large enough for any ordinary use, some may prefer to disbud for even larger blooms. Pinkie is the delightful rose pink shade found in the popular mixture. Purity is the glistening white also found in the mixture. Since their introduction last season, both Pinkie and Purity have become leaders for cut flower use.

Poppy Nudicaule Imperial Jewels Mixture (Bodger)

DAZZLING as a rainbow shimmering in summer mist, scintillating as the Imperial Crown Jewels, the kaleidoscopic coloring of our new Imperial Jewels Iceland Poppy is a delight to behold. We are offering you in this Mixture the very finest and most outstanding Iceland Poppy yet produced. The mixture contains wonderful color shades, from light to very deep orange, all shades of yellow, creamy white and pure white, every imaginable shade of pink from shell pink to salmon pink, deep rose and nearly red tones and many pastel hues of apricot, buff and chamois. The variety of color tones is almost limitless. The flowers are beautifully frilled and fluted, many of them semi-double and all 4 to 5 inches or more in diameter. The stems are all extremely long, 20 to 24 inches, wiry and strong, and bearing flowers upright in regal splendor. Imperial Jewels Mixture is so far ahead of any other Nudicaule Poppy available, that no florist can afford to be without it for his best cut flower trade.

No. 551—NICKELTYPES \$15.00

Nierembergia Hippomanica (Dwarf Cup Flower)

○ F ALL the hundreds of new flower introductions which have come under our observation during the course of the past few years, none has caused so much comment from visitors to our farms as this little Dwarf Cup Flower, *Nierembergia Hippomanica*. With the possible exception of *Zinnia Linearis*, it will outbloom any flower we have growing. It starts flowering when the plants are only about two inches tall, that is about 15 weeks after the seed is sown, and keeps on right up until the heavy frosts of late fall. It is at all times neat and tidy looking, the young flowers coming and covering the older flowers and seed pods. The lovely lavender blue shade, heightened by a touch of yellow in the center, is most charming. Plants are definitely dwarf, compact—streamlined, if you will—not over 5 or 6 inches tall, and with a spread of only 8 to 10 inches. Foliage is light gray green, very inconspicuous, and there are literally hundreds of flowers in bloom at a time throughout the summer. As an edging plant, for the border along a walk, or to outline beds of larger flowers, it has no equals, while for use in the rockery it is unexcelled and is extremely lovely in a window box or in flower pots. It is a half hardy perennial which will winter over if given some protection. In the southern warmer sections, no protection will be necessary. The plants should be cut back at the end of the season and will send out fresh growth in the early spring.

Approximately 168,320 seeds per ounce.

Cineraria California Super Giant

Cineraria Calif. Super Giant Salmon Shade
 No. 131—ELECTRO \$2.35

THROUGH an arrangement with the originators, Howard and Smith, we are headquarters for their Superb California Super Giant Cinerarias. Recognized throughout the world as outstanding, the Howard and Smith strain of Cinerarias has long been acclaimed by connoisseurs. Starting where the older strains left off, the new California Super Giant type takes the last step toward Cineraria perfection. It is the result of many years of intensive breeding and selection and this year's seed, which is now ready for immediate delivery, was

saved from the very finest stock plants, reselected to flowers with broad, firm strap petals.

The beautifully formed flowers measure from 4 to 6 inches in diameter with individual petals as much as 1 to 1½ inches wide, and although flowers are not produced as abundantly as in the ordinary Grandiflora strain, they are borne profusely in immense rounded trusses above the very attractive clean, bold, dark green foliage. The plants are compact in habit, 15 to 18 inches high, vigorous, and most remarkable, basal branching, a revolutionary departure in Cineraria development.

In range of color the strain is unchallenged. From exquisite pastel salmon, azure blue and snowy white to the deepest blood red and violet blues, whether solid self colors or highlighted with contrasting central zones, the mass of color is magnificent.

We offer originator's seed in three separate color groups and in a superb mixture of all colors and shades.

Marigold Gigantea Sunset Giants (Bodger)

SUNSET GIANTS, which we introduced two years ago, has been very favorably received. We have had many glowing reports on it, with special reference to the large size and sweet scented character of the flowers. Sunset Giants is the very largest Marigold yet developed, flowers in the field covering about 5 inches in diameter, while those grown for show purposes have been known to attain a size of 7½ or 8 inches. The definite sweet scent of the flowers adds to its value as a cut flower variety, as well as being a good garden plant. The full centered flowers of fairly loose formation, with broad heavy petals gracefully overlapping, are of great depth and even larger than the Dahlia Flowered Zinnias. The color range includes deep orange, golden orange, deep golden yellow, light yellow, lemon yellow and a delightful new shade of primrose. The plants are extremely robust, producing a heavy growth of foliage, with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Plants are usually 3½ to 4 feet tall, but under extremely favorable conditions, have been known to grow as much as 7 feet. Flowers are produced about the first of August in most sections of the country, in late June in the southern states, and can be depended on to flower well before frost in any latitude. Sunset Giants has been tested and found to be a fine forcer in the greenhouse. While a certain percentage of single flowers may still be expected in this strain, the excellence of the full doubles more than compensates for the singles.

Calendula Campfire Bodger's Improved Florist Strain (Bodger)

SOME years ago we introduced a sensational new Calendula under the name of Campfire (Sensation). This variety has been a leader with florists since its introduction. Since then we have been continuing our selection work on it, until we were able to introduce a vastly improved reselected strain of Campfire which is even better adapted to florist use. The flowers are more uniformly large and well formed, on plants neat and compact in habit. The color is now well known, a very deep strong orange with a distinct scarlet sheen on the upper side of each petal. While the center is light, this is scarcely ever noticed because of the complete doubleness of the flower. Blooms measure at least 4 inches in diameter and are of the characteristic flat topped formation demanded by the florist trade. The plants are strong growing and even in habit, with exceptionally long heavy cutting stems, produced in generous quantity on each plant. Since its introduction, this strain has more than fulfilled our expectations for it as a fine new florists' cut flower variety.

No. 2498 Price per oz., \$.35 Per lb., \$4.00

Approximately 5,200 seeds per ounce.

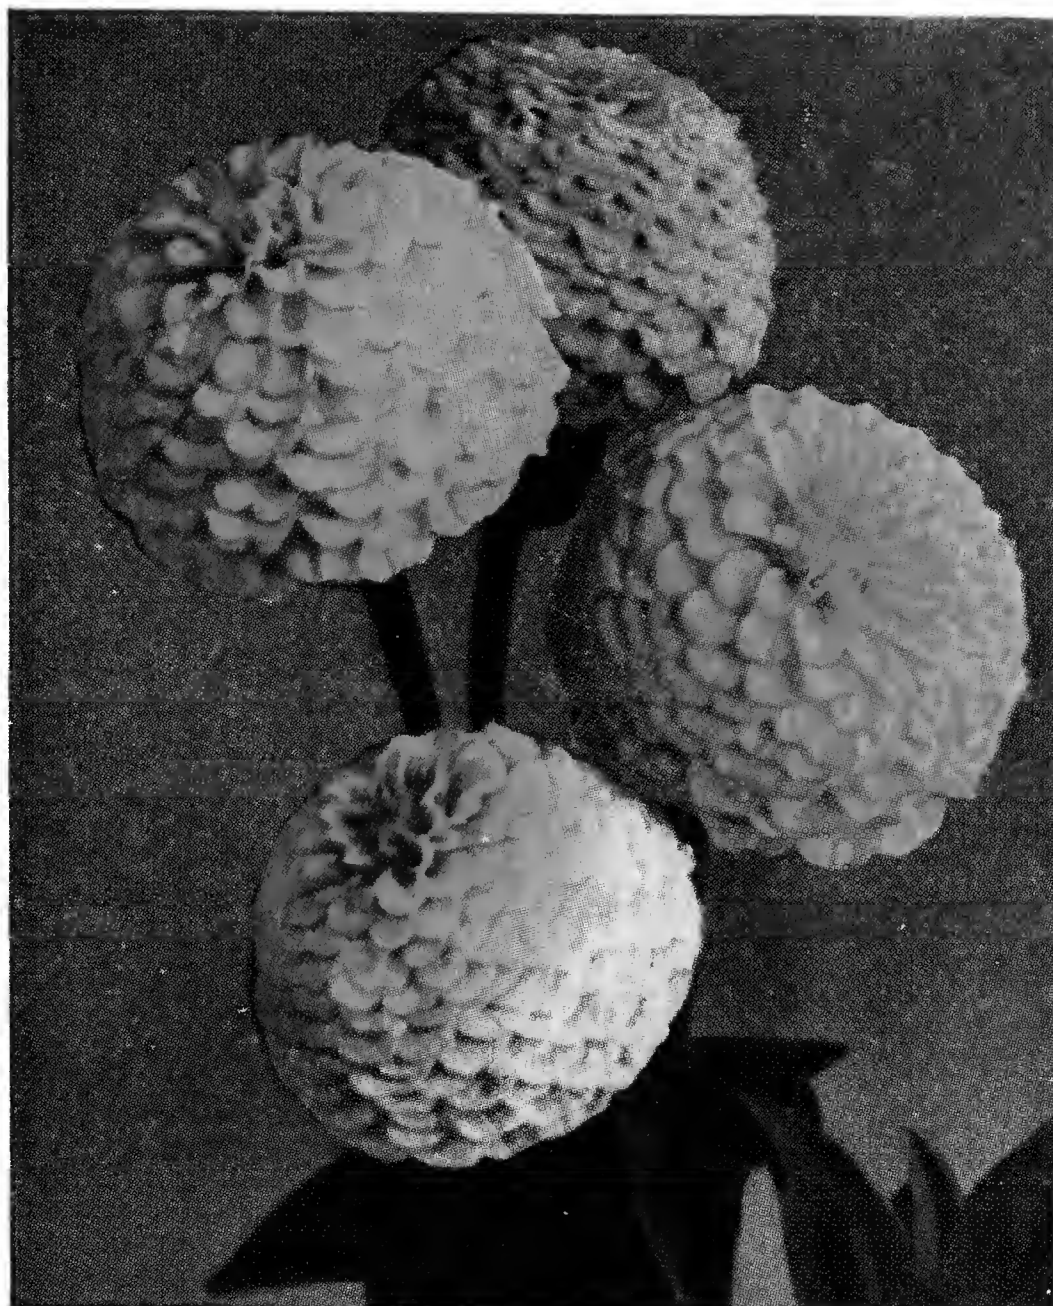

No. 537—NICKELTYPES \$15.00

Zinnia Linearis

THE most unusual and interesting of the newer Zinnias is the little dwarf variety, Linearis. The flowers, which are single, are a lovely shade of golden orange, with a delicate lemon yellow stripe through each petal, while the center is dark brown in the young flowers, turning golden orange as the flower develops. It is early blooming, commencing to flower when the plants are about 6 inches tall and keeping on right through the season until the late frosts of autumn. It never looks untidy, as the dozens of newly opened flowers prevent the faded ones from becoming prominent. The plants reach a height of 8 to 10 inches and with plenty of room for development may have a spread of as much as 2 feet by the end of the season. Flowers are produced in great profusion, literally hundreds being open at a time. Linearis is an extremely valuable addition to the list of plants suitable for border or edging use and is excellent for window boxes or in any part of the garden where a dwarf growing plant with brilliant coloring is desired. It is the longest lasting of all flowers in pots, and when cut will last nearly two weeks in water. It will start flowering about 10 weeks after seed is sown.

No. 1592 Price per oz., \$.80 Per lb., \$9.00

Approximately 123,650 seeds per ounce.

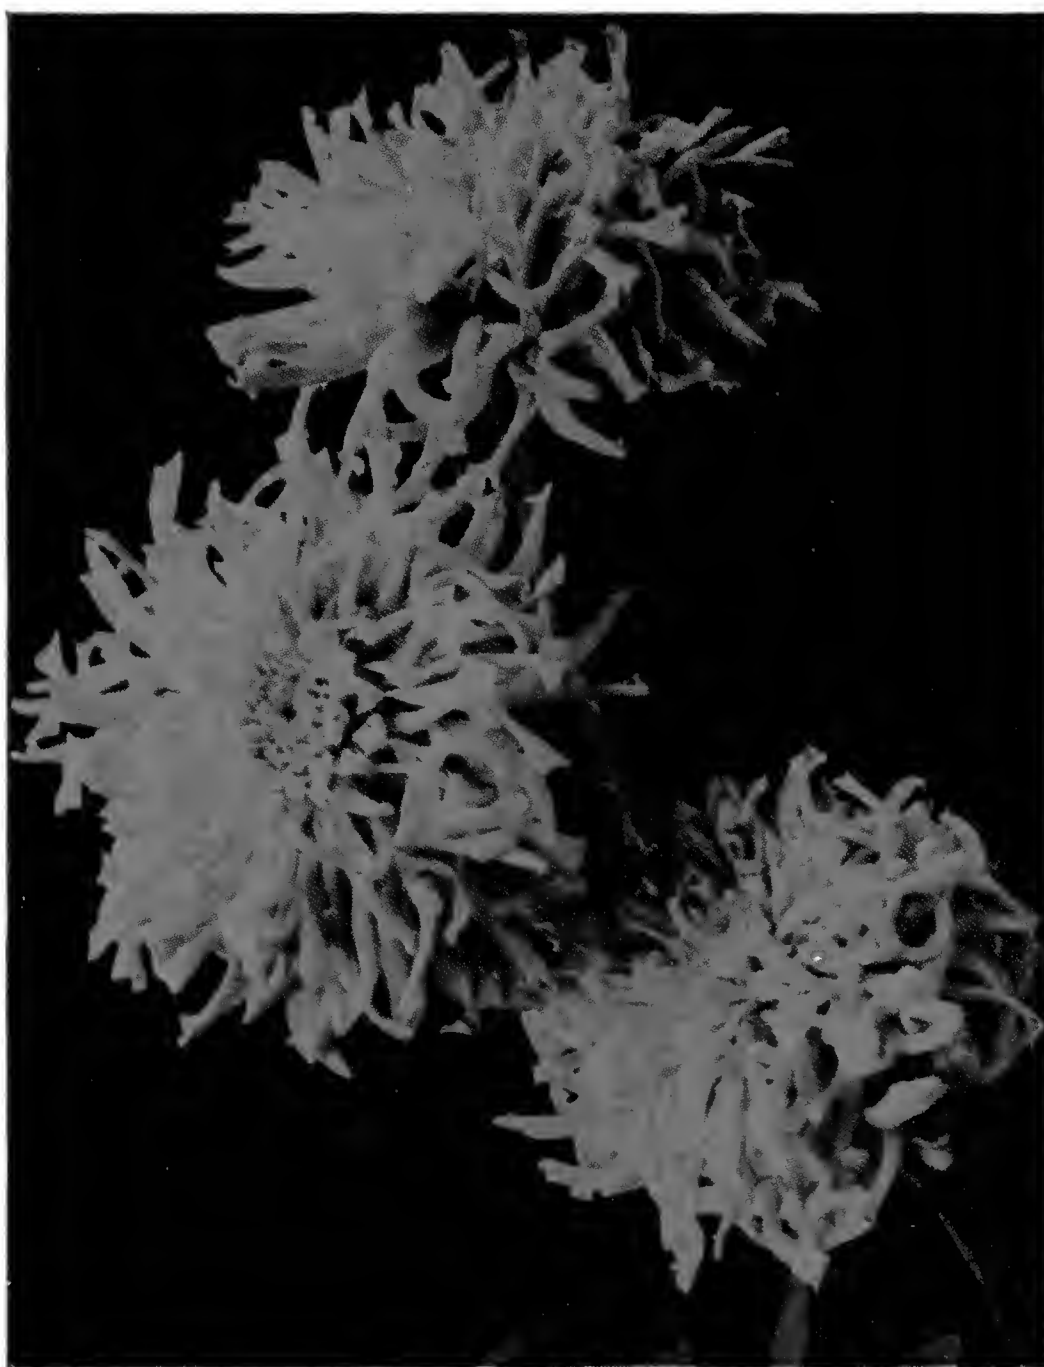

No. 539—NICKELTYPES \$15.00

Zinnia Lilliput Pastel Mixture (Bodger)

WHILE there is a great diversification of type in the newer Zinnia introductions, the older types are still maintaining their popularity. This is particularly true of the Lilliput or baby Zinnia. Because of the neat, compact, symmetrical habit of the flowers together with their small size and stem length, they are particularly fine for cutting for bouquets in the home. When we think of flowers for cutting, our minds automatically turn to the pastel shades. Until recently, there has been no strictly pastel variety in the Lilliput type. In the Pastel Mixture, however, we have incorporated the very lovely soft shades of apricot, peach, creamy yellow, shell pink, delicate salmon, light rose and orchid which are prime favorites with florists and cut flower growers. The plants are 12 to 15 inches in height, neat in habit, compact growing and very free flowering. It is one of the early blooming types, producing flowers about 45 days after seed is sown.

No. 1420 Price per oz., \$.33 Per lb., \$3.50

Approximately 4,600 seeds per ounce.

No. 538—NICKELTYPES \$15.00

Zinnia Fantasy Star Dust (Bodger)

Award of Merit **ALL-AMERICA SELECTIONS** 1937

AMONG the great variety of new Zinnia types recently developed, the Fantasy type has received more publicity than any other. Its shaggy informality immediately recommends it for cut flower use. Furthermore, since the flowers are of medium size, they are easily handled and can be arranged gracefully in bouquets either by themselves or in combination with other flowers. Star Dust, the lovely golden yellow variety in this popular type, has the characteristic informal, shaggy-petaled, medium-sized flowers, on plants 2½ to 3 feet in height, with stems of good length for cutting. The plants are free blooming, making a fine show of color in the garden. Flowers may be expected 45 to 50 days after seed is planted.

No. 1344 Price per oz., \$.45 Per lb., \$5.00

Approximately 5,000 seeds per ounce.

No. 540—NICKELTYPES \$15.00

Zinnia Gaillardia Flowered Finest Mixed (Navajo)

Recommended **ALL-AMERICA SELECTIONS** 1938

ANOTHER of the newer Zinnia types which resembles another flower group, the Gaillardia Flowered Zinnia does strongly remind one of the Picta Double Gaillardia. It is said to be a cross between the Haageana and Elegans types, resembling the Haageana in flower form and the Elegans in foliage and flower color. The flowers are very attractive, of medium size, about 2 inches in diameter, just a good size for cut flower use, and are carried on stems of medium length. The plants are about 2 feet tall and very free flowering. The colors range through the mellow tones of rose, pink, bronze, yellow, orange, lavender, and combinations of these colors. Most of the flowers, in fact, are two toned, with a ring of deeper color toward the center of the flower. Flowers will be produced about 45 days after seed is sown.

No. 1598 Price per oz., \$.45 Per lb., \$5.00

Approximately 4,500 seeds per ounce.

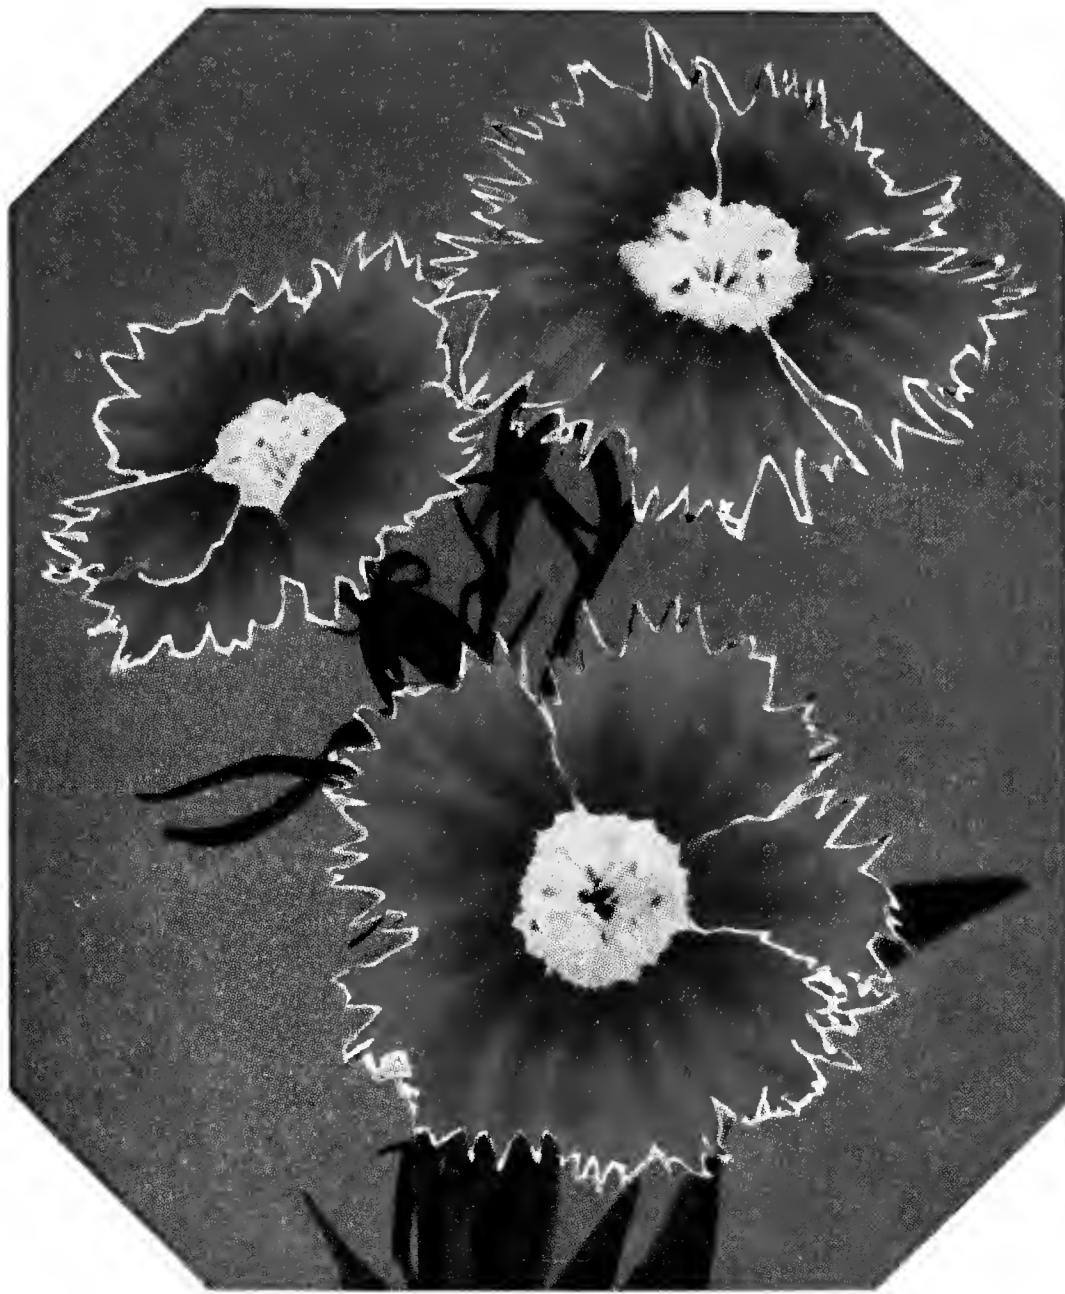

No. 548—NICKELTYPES \$15.00

Ipomea Clarke's Earliest Heavenly Blue Morning Glory

THE beautiful sky blue of the Heavenly Blue Morning Glory is unquestionably one of the loveliest shades in any flower, a beautiful sky blue color which shades at the center to a golden throat. Throughout the south and other sections where Morning Glories are extensively grown, Clarke's strain will need no introduction. It is the earliest flowering variety, makes a sparse growth of foliage and is heavily covered with flowers. These flowers are very large, of the characteristic Morning Glory form, and although they close by noon, the glory of their morning beauty cannot be equaled. For covering a fence or trellis, or climbing over a small building, the Heavenly Blue Morning Glory is ideal. As it is a tender annual, seed should not be sown until late in the spring. In order to get the greatest quantity of flowers from the strain, seed should be planted in a dry sandy location where the plants will receive as little water as possible and they should never be fertilized unless a heavier growth of foliage is required. If desired, seed may be started early indoors, but if so, should be planted in individual pots as Ipomeas do not transplant readily.

Approximately 675 seeds per ounce.

No. 546—NICKELTYPES \$15.00

Dianthus Laciniatus Splendens

Special Mention **ALL-AMERICA SELECTIONS** 1935

SPLENDENS is the most striking Dianthus we have ever offered. Although it has been on the market in this country for some four years now, popular demand still keeps it in the active novelty class. It is neat, compact in habit, growing 6 to 8 inches in height and produces hundreds of its showy flowers throughout the season. There are dozens of flowers in bloom at a time on each of the little mound-like plants which remain in full flower throughout most of the summer months. The strongly sweet scented single flowers are large, about 2 inches in diameter, brilliant crimson with a vividly contrasting large white eye. A very showy plant, it has but few equals for edging or border use, or as a rockery subject, while the large, short stemmed flowers are fine in the miniature bouquets which are just now so popular. It is an easily grown, free flowering all around garden annual.

No. 3462 Price per oz., \$.45 Per lb., \$5.00

Approximately 28,000 seeds per ounce.

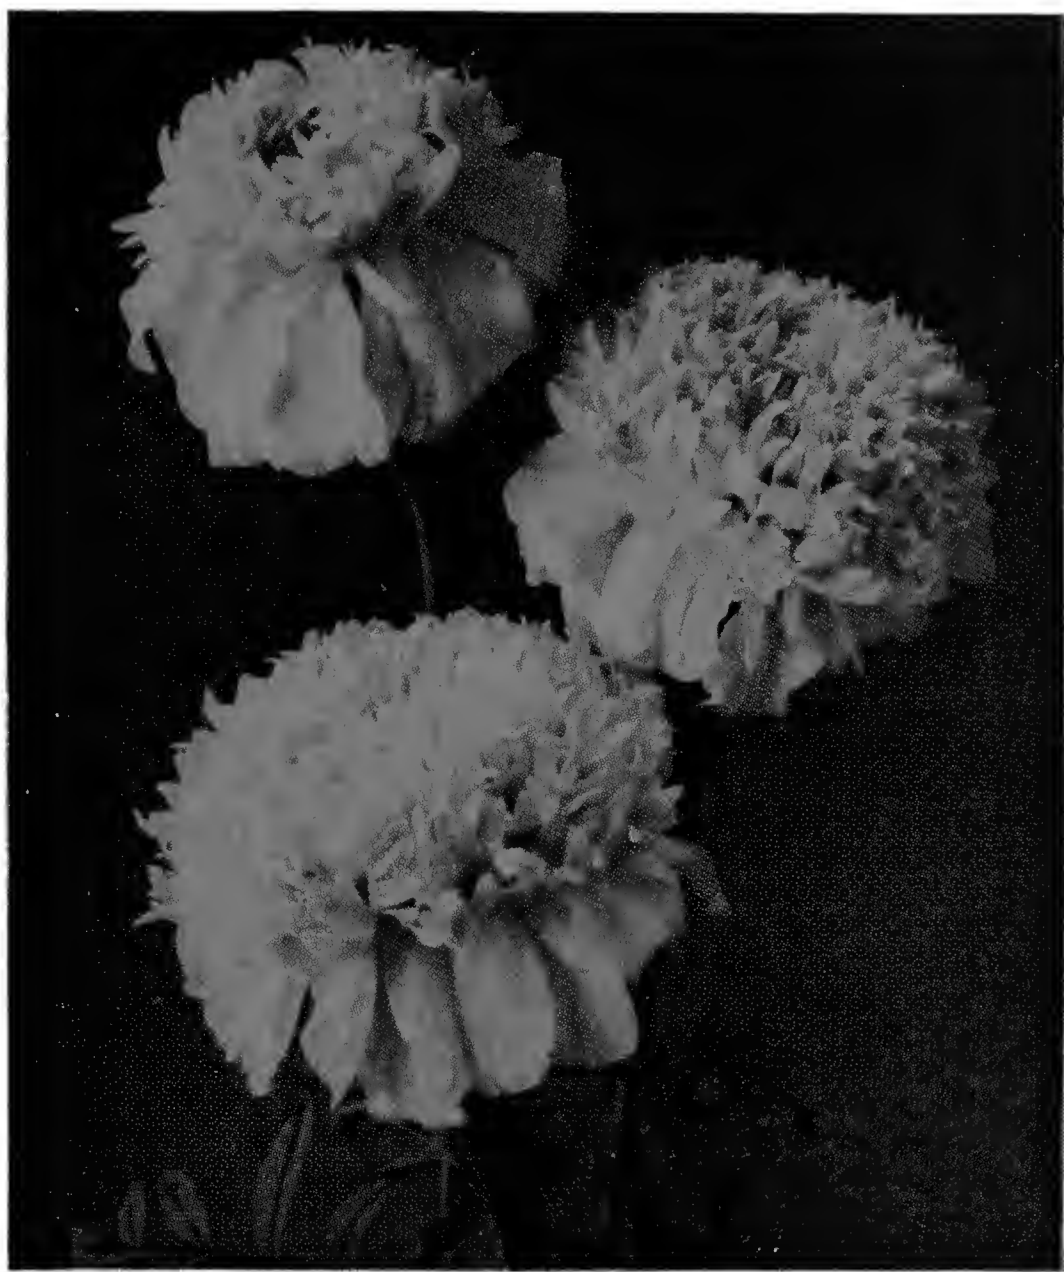

No. 544—NICKELTYPES \$15.00

Marigold Dwarf French Double Harmony

HARMONY is without any question one of the very finest Marigolds ever introduced. It is in all respects outstanding. The flowers are charming and distinct, Scabiosa-like in formation with tubular deep orange center petals flanked by broad velvety dark maroon-brown guard petals. The plants are dwarf, about a foot high, compact, exceedingly free blooming and extremely early, coming into flower with us about June 1st. From all sections of the country we have had excellent reports on this variety, special notice being taken of the extremely early blooming habit. Harmony is 100% true to type, color and habit. Although it is strongly scented with the characteristic Marigold odor, this drawback is more than overcome by the attractiveness and unique beauty of the flower. It is excellent for use in the garden, either in beds or borders, and most attractive when used for cutting.

No. 4798 Price per oz., \$.30 Per lb., \$3.00

Approximately 10,000 seeds per ounce.

No. 545—NICKELTYPES \$15.00

Marigold Collarette Crown of Gold

Gold Medal **ALL-AMERICA SELECTIONS** 1937

GIVEN more publicity than any other flower last season, Crown of Gold was the only Gold Medal winner in the All-America Selections Competition for 1937. Its main claim to glory is the fact that there is absolutely no trace of the characteristic Marigold odor in the foliage, stems or flowers. It is the first of what will, undoubtedly, be a new race of completely odorless Marigolds. The flowers, which are of medium size, about 2½ inches in diameter, are a lovely golden orange shade with a full crested center of small tubular petals surrounded by a single row of broad guard petals. The plants are 2½ to 3 feet in height, freely branched, with a sparse growth of foliage, not unusually showy in the garden, but with stems of good length for cutting. Crown of Gold is valuable as a cut flower variety, primarily, where it will be a boon to those who do not like or are sickened by the pungent Marigold scent. It is early blooming and stays in flower for several weeks.

No. 4792 Price per oz., \$.45 Per lb., \$5.00

Approximately 8,000 seeds per ounce.

ASTERS *a*

LARGE FLOWERED, HEAVY STEMMED, SPECIAL FLORIST VARIETIES

EARLY GIANT WILT RESISTANT *f* (Bodger)

The finest large flowered, heavy stemmed wilt resistant Aster yet developed. Flowers are of the large Giants of California type, while the plants are less tall, about 1½' in height, with strong heavy stems. This class is early blooming, coming into flower four to six weeks earlier than the Giants of California, that is during early to mid August. An exceptional new class.

Comparative Zinnia Flower Types

No. 322—ELECTRO \$2.90

ZINNIAS *a*

We have been Zinnia specialists for many years, taking the lead in their development ever since our first outstanding Zinnia introduction, the Dahlia Flowered strain, which was rightly named a New Flower for the People. This type, developed in our experimental department and introduced by us in 1919, was the turning point which changed completely the status of the once unpopular Zinnia family. Since this time, we have developed and introduced many new types and varieties in the now extremely popular Zinnia group. Many additional varieties are in the process of development in our Zinnia workshop and will be presented within the course of the next few years. See our Bulletin No. 1, The Zinnia and its Uses, for full details on Zinnia Types and Culture.

TALL, LARGE FLOWERED TYPES

BODGER'S GOLD MEDAL DAHLIA FLOWERED *f* (Bodger) (G.M.,R.H.S.'24)

The Dahlia Flowered strain was introduced by us in 1919, and all the colors have been of our introduction at various times since then.

The plants are of medium height, 2½'-3', very robust, bearing many strong stems of the fully double, huge flowers which resemble the show type of Dahlia. We have marked the most popular varieties with an asterisk (*).

	Per oz.	Per lb.
1260 *Canary Bird, rich canary yellow.....	.35	3.50
1262 *Crimson Monarch, deep crimson, flowers very large.....	.35	3.50

Zinnia Haageana
 No. 168—ELECTRO \$2.00

HAAGEANA DOUBLE (Mexican Hybrids)

The small flowered Mexican Zinnias have a charm all their own. The smaller flowers lend themselves to bedding and make a brilliant display and yet have stems long enough to make fine bouquets for small vases and bowls. The mixture contains many attractive colors and color combinations.

CINERARIA CALIFORNIA SUPER GIANT *gr b*

By arrangement with the originators, Howard and Smith, we are able to supply their famous California Super Giant Cinerarias in packets or bulk. All seed we offer is grown by the originators under the personal supervision of their veteran hybridist Fred Howard. Plants are basal branching, free blooming, and extremely large flowered. (See page 29).

DELPHINIUM PACIFIC GIANTS *pf* (Vetterle and Reinelt)

Remarkable new strain developed by Vetterle and Reinelt on the Pacific Coast. Flowers extremely large and well formed, 2½" to 3½" in diameter, symmetrically spaced on well balanced spikes of thin woody stems, practically 100 per cent double. This strain is comparatively mildew resistant. Seed we have to offer includes shades produced by the originator and a mixture of our own growing produced from the originator's stock seed.

3400	Dark Blue Shades (originator's stock).....	7.50	90.00
3402	Dark Violet Shades (originator's stock).....	7.50	90.00

No. 418—ELECTRO \$2.35

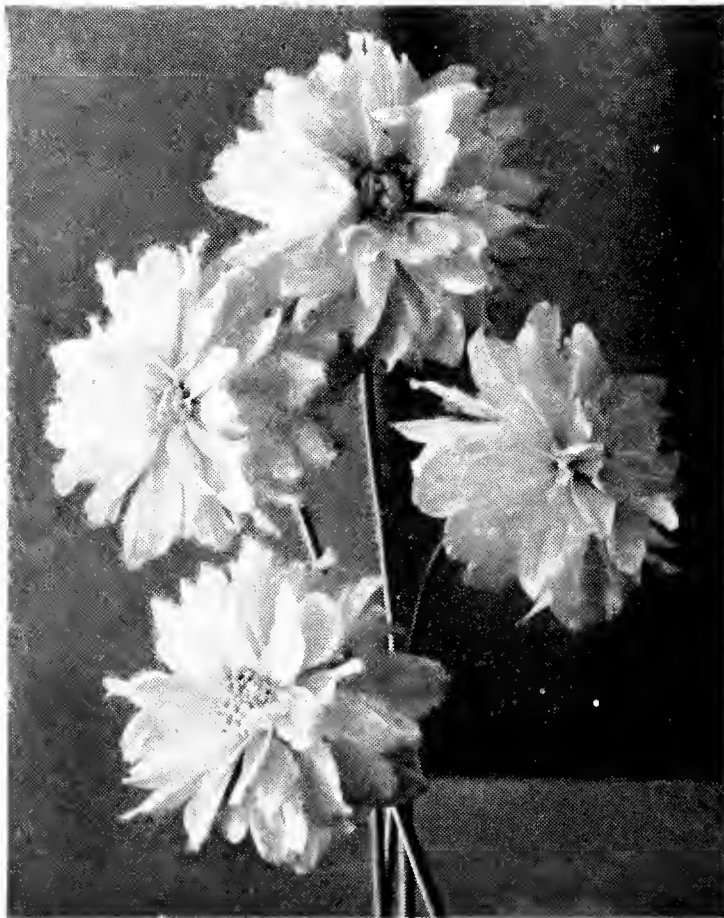

LARKSPUR GIANT IMPERIAL *af*

Tall, upright, compact, basal branching in habit, the Giant Imperials have superseded all other types of Larkspurs for florists' and general garden use. The delphinium like spikes of double flowers, carried on stems 4'-5' long, are compactly placed on the upright growing plants, requiring only about one-half the space needed for the old stock flowered type of Larkspur.
